WILD Woodland Scavenge – Physical activity hunting for specific natural objects within a woodland setting.

Worksheet included? No

Children's learning objectives

- To identify natural objects found in a woodland environment
- To discuss what was found within a woodland environment
- To review other children's work and say what they think and feel about it

What you will need

A camera might be useful to record photos of locations where particular items are found. These photos could then be used to aid reviewing the activity back at school.

Groupings

This activity can be completed individually (with accompanying adults for assistance).

List of wild and wonderful things to find

- A plant which creatures eat
- A seed
- Something smelly!
- Mini-beasts or creepy crawlies
- A leaf which isn't green or brown
- Evidence of an animal
- Something smooth
- Something prickly
- Clues as to where animals live
- Evidence of human beings.
